Indian Azaleas

Are grown by me on a very extensive scale in a prime quality stock. My plants are of a good round shape, compact and bushy. The best varieties only are grown by me in quantities and as a rule I can give purchasers the choice of the leading sorts, a large stock in M^{me} Van Der Cruyssen, from 1 to 200 is on hand, D. Perle and Vervaeneana are also well represented at these prices.

I quote the sizes approximatively as the size will vary with different sorts even if of same age. I always endeavour to give full value, and therefore would ask to order by letter or money quotation in preference to order by inches.

P. S. Only a few are disponible of the two largest sizes.

NOTICE

I have in cultivation a few thousands Seedling Azaleas, of which several beautiful novelties have been picked for cultivation, all the others, ordinary sorts, of good red, rose and white colors, are grown into nice **DWARF** plants, these I offer as a bargain, plants well budded 10 to 14 inches diam: at \$ 15,00 per 100.

Dwarf or shrubby Azaleas

(on own roots)

These have become great favorites in the American market, they are very suitable for baskets and pans Ch^{as} Encke pink and white, Marie-Louise pure white, and firefly bright crimson are the main and most popular sorts grown that way, besides I cultivate on own roots a few of the older kinds. As the stock is a limited one, I prefer to sell these dwarf kinds only to such who favor me with part of their other trade.

I offer the Firefly
